

Do you need reliable technical support?

Benefit from ongoing support provided by Netblaze Systems

The primary reason growing businesses engage us is our proactive network management. Netblaze AssureNET offers a complete IT management contract that provides ongoing maintenance and support to keep your network and systems operational. These services include:

- Regular proactive network and system maintenance
- Timely security updates and service pack installations
- Unlimited complimentary support calls for up to 15 minutes
- Streamlined IT support budgeting

Netblaze Systems provides prioritized recommendations for maintenance and improvement over time and within budget. Netblaze support is flexible and adaptable to ensure that the implementation of technology continues to support the growth of your business.

"Our business has benefited immeasurably from our decision to engage Netblaze as our integrator. We have a stable, reliable Citrix infrastructure in no small part because of the skill level, competency and dedication of the Netblaze team."

Nick Fitzpatrick
Laughlin, Falbo, Levy
& Moresi LLP

Solutions for your IT challenges...

Netblaze Systems engineers have been involved in network design and installation for more than 25 years. Give us a high-level overview of what you are looking for, and we will design a cost-effective, high-performance system for your company.

Or, Netblaze can provide validation or suggest alternatives to your current IT practices, identify potential problems and opportunities, and design and implement enhancements to your network, including backup and contingency strategies.

- Network design, implementation and support
- Microsoft Windows Server and Small Business Server
- Corporate e-mail systems (Microsoft Exchange)
- Thin-Client/Server-Based Computing
- Remote Access Solutions and Virtual Private Networking (VPN)
- Disaster recovery and business continuity planning services
- Virtualization technologies (Microsoft Virtual Server and VMware GSX/ESX)
- Onsite network administration and support

"My expectations have definitely been exceeded—if I wasn't sitting at my desk I would be dancing with delight! I'm very happy with how this is all working so thank you again!"

Vikki Cantwell
Pressure Cast Products
Corporation

Netblaze Systems specializes in design, implementation and support of all Citrix-based products. We have advanced CCEA certified Citrix Engineers on staff with experience in complex enterprise-size deployments. Let us evaluate your remote access needs and see if Citrix is the right solution for your small business.

Extensive product selection and exceptional pricing
Our low overhead allows Netblaze Systems to offer highly competitive pricing on hardware and software including Dell, HP, and IBM server hardware, desktops and workstations, infrastructure hardware, plus solutions for backup, antivirus, anti-spyware, and licensing.

Exceeding expectations everywhere

Information technology that keeps pace with and supports your growing business requires proactive planning, implementation and management. If your business depends on computers, you're not too small for an IT department.

*Consider
Netblaze Systems
as your access
to cutting-edge,
cost-efficient
IT solutions.*

Netblaze Systems provides the expertise and personalized service required to ensure IT solutions that meet your needs. For significantly less expense than hiring internal IT staff, benefit from the advantage of the best practices, strategy and experience of a firm focused exclusively on the growing business market.

"Just wanted to send a big thank you for the outstanding service you have given to us. Our system has never operated so smooth and the new program installs you have done recently are working great."

—Gina Casey,
Hinton, Alfert and Sumner
